

**NEF İNOVASYON**

**"BEFORE ALL - MAN"**

# Who are we?

Gathering under one roof our organizations, for many years leading activities in the field of radiology - Medi-Rek Saglyk, Electra Saglyk, Bagjylar Screening, and in the field of physiotherapy - Yildash Medikal, since 2018, Nef Innovation continues your professional way.

**Nef Innovation was created in order to make a new look at the medical sector, fueled by experience and combining this experience with creative technologies and approaches. It comes to the professional path to become an assistant in an effective solution for multinational firms in Turkey, at the same time to represent large companies not operating in Turkey, to become an important player in the medical sector, maintaining the quality of services at the highest level.**

Our company has been very successful at the local, regional and national levels from the very foundation of the present due to successful and developed services and has made a great contribution to the domestic economy. The most important effort for us in the future process will be the maintenance of strong relationships with all our partners based on trust.

**Nave Innovation is a medical company created to develop solutions in the field of screening and physiotherapy and the provision of services that take these decisions as a basis.**

## **Our mission**

Developing innovative achievements in the industries in which we conduct our business and using technology at the highest level, create profitable and productive companies at the national and international levels and become one of the most important players, indicating in which direction the Turkish economy will move.

Without making concessions to the quality of products and services, while maintaining customer satisfaction in the forefront, to become the leading group of companies that makes a positive contribution to society and the environment, increasing from day to day the goals and successes obtained from activities and aimed at providing services more broad masses.

## **Our vision**

Without making concessions to the detriment of our values and introducing innovations wherever we are present, invest new investments with high added value and rise to the leadership position in the countries and sectors in which we are present.
